# WE KEEP ON EVOLVING!

MASSEY FERGUSON

From the original Ferguson three-point linkage system which revolutionised farming, through to the latest SIMA award winning electronic top link control system, Massey Ferguson keeps on evolving.

Designed, tested and precision engineered by the people who build your tractor, genuine 10+ replacement hydraulic and linkage parts will ensure your MF tractor and implement continue to work harmoniously as one.

Keeping it original, Keeping it Massey Ferguson.

**Contact your local Massey Ferguson dealer today for further details of the comprehensive range of 10+ Parts or visit our website: [www.MasseyFerguson.com](http://www.MasseyFerguson.com) to find your nearest MF Dealer.**

### The biggest breakthrough in linkage control since our last one.

The invention and perfection of the three point linkage by Harry Ferguson in the 1930's was without doubt one of the major landmarks in the development of modern farming. It is therefore only fitting that the same company, Massey-Ferguson, should be at the forefront with the new electronic draft and position control system fitted to the MF 2000 Series tractors. The system has been widely used by farmers in the field, and has gained a solid reputation for ease of operation and reliability.

A simple to operate control panel gives you complete mastery. Electronic sensors mounted on the 3-point linkage relay changes in draft and position to the hydraulics faster than any mechanical system. The result - immediate reaction

to changing soil conditions, saving time and money. In addition fewer working components mean less maintenance and extra reliability. It all adds up to greater efficiency, greater productivity.

Harry Ferguson made his great leap forward listening to farmers, and giving them what they needed. At Massey-Ferguson, that's a tradition we still proudly follow today.

**Massey-Ferguson**  
Where farmers' ideas take root.
